SIDE LOADER COMPACTOR

a company of BUSIGROUP

Busi Group, dynamic solutions for a clean future.

The best systems for waste collection

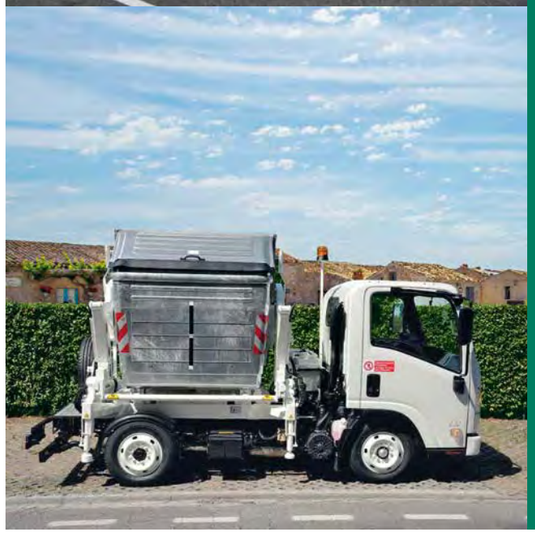

OMB Technology is specialized in the design and manufacturing of containers of various typologies and vehicles for the side and back loading collection of waste. With an experience of over 50 years, the company established in Brescia is recognized in Italy and abroad for being able to create a collection system with a single-operator and side-loading vehicle and for being able to create unique, innovative and functional solutions in the water collection system.

OMB offers its customer an exclusive consultancy and know-how, a service oriented to those pursuing not only a product but also a solution. Well-established experience, a continuous technological updating and research aimed at the innovation make OMB a leading company in the sector, able to offer an integrated system recognized worldwide with a range of products in line with the best solutions.

SIDE LOADER COMPACTOR INDEX

CM4ET	SIDE LOADER COMPACTOR LIGHT	P.04
CMPL7ETSA	SIDE LOADER COMPACTOR HEAVY	P.06
CWS B2	SIDE LOADER COMPACTOR WITH INTERCHANGEABLE BODY	P.08
BM2	HANDLING CONTAINER EQUIPMENT	P.10

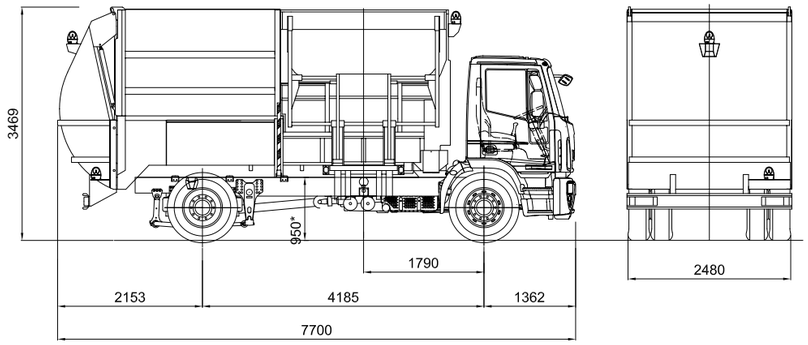

SIDE LOADER COMPACTOR CM4ET

SERIES CM4ET | SIDE LOADER COMPACTOR LIGHT | 2 axles

The CM4 side loader is designed for gross weight and net pay-load two axles vehicle optimization.
The fixed hopper and the special compaction system, which uses a telescopic cylinder for waste compaction and the discharge phase as well, allow to obtain a substantial overall weight of the structure reduction compared to the conventional two axles side loaders, guaranteeing much more significant loads.

CM4 is the best solution to apply the side loader series also in critical situations such as small city centre or all those urban areas characterized by difficult road access condition. Electronic devices, board control panel and the diagnostic system are the same equipped on OMB bigger vehicles, so that functional and operational advantages are the same.

CHARACTERISTICS

Capacity	Chassis	GVM	Wheelbase
14 mc	2 axles	18	4.185
16 mc	2 axles	18	4.185

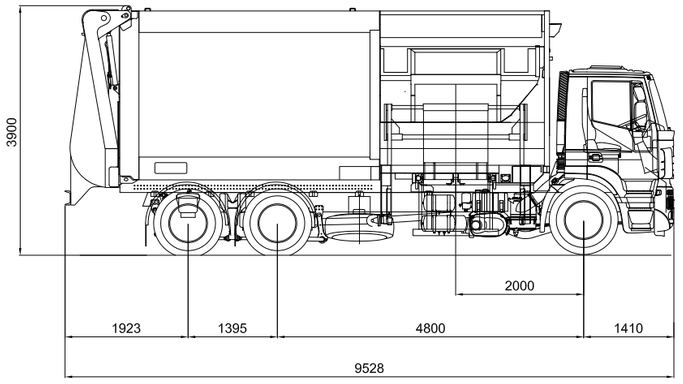

SIDE LOADER COMPACTOR CMPL7ETSA

SERIES
CMPL7ETSA

SIDE LOADER
COMPACTOR HEAVY

2 axles
3 axles
4 axles

The CMPL7 ETSA side compactor is the latest evolution of the of CMPL vehicles with which OMB introduced, first in Italy and then in other countries, this technology applied to waste collection.
ETSA version has been designed to maximize the payload of the equipment, keeping the strength and reliability that have always characterized OMB compactors.
The proportional hydraulic system allows to combine speed, precision and movement fluidity, reducing mechanic stress on both the machine and the bins, limiting noise and energy consumption.
The improved electronic system compared to the previous models, represents the “state of the art” in waste collection field, providing high-tech features but at the same time an “user friendly” layout for an easy compactor use (functional-maintenance-diagnostic).
OMB side loader series offers two, three and four axles version with specific solutions (Natural gas-Glass).

CHARACTERISTICS

Capacity	Chassis	GVM	Wheelbase
14 mc	2 axles	18	4.185
19 mc	3 axles	26	4.200
25 mc	3 axles	26	4.500
27 mc	3 axles	26	4.800
30 mc	4 axles	26	5.100

SIDE LOADER COMPACTOR CWS B2

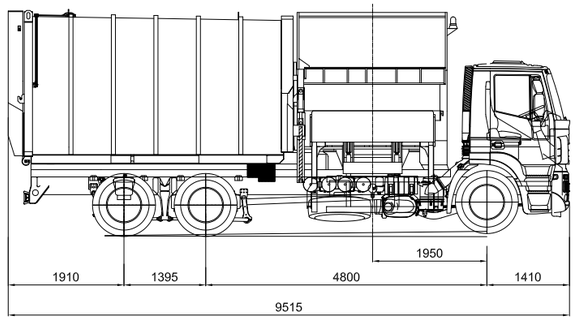

SERIES
CWS B2

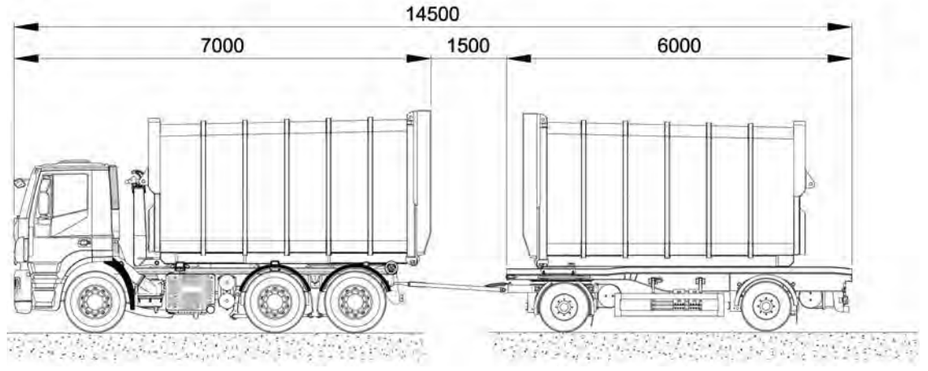

SIDE LOADER COMPACTOR WITH INTERCHANGEABLE BODY

3 axles

CWS B2 side loader main feature is that the body is not permanently fixed to the chassis structure. The container is interchangeable and it can be demounted and replaced with another one empty, thanks to the special device integrated in the CWS system.
This allows to use the compactor continuously, taking time only for the container changing. The container can be trasported by means equipped with a standard hooklift equipment.

The system makes a separation between the collection phase and the transport one which it can be made in a different moment by using the same body.
So the CWS side loader allows to achieve high level of efficiency, optimizing the collection and the transport phase.
This system is suitable in case of long distance between the collection area and the waste destination, or in special touristic areas characterized by extreme variability of the service during the year.

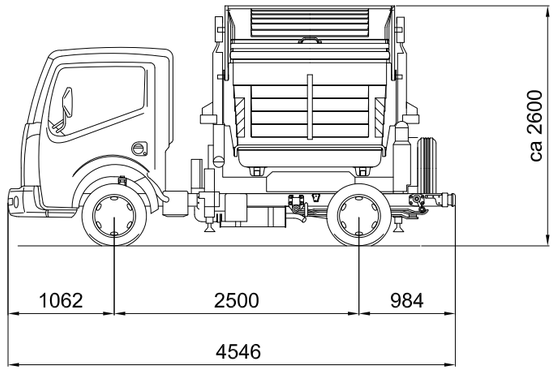

SIDE LOADER COMPACTOR BM2

SERIES BM2 | HANDLING CONTAINER EQUIPMENT

BM2 vehicle is the OMB solution for the waste containers handling in operative areas. OMB system allows to move, turn over and empty the container inside a street sweeper or in a rear loader compactor. BM2 is as well a really precious equipment in handling side loader containers (replacement, maintenance).

Flexible, easy to use and easy to handle, are the main features of this equipment which could be installed onto a large range of two axles chassis.

The power of a strong group.

From production to distribution on the market through a sales network that operates in Italy and abroad, the Busi Group integrated system is able to ensure optimal performance of products and **consulting services and assistance to solve all customer requirements regarding waste management.**

Specialized in specific collection systems, Busi Group companies are:

B.T.E. S.p.a based in Paitone, in the province of Brescia, is a company that since 1991 produces and markets products for the collection, compaction and transport of waste (equipment for vehicles, special equipment, roll-off compactors, stationary presses, roll-off boxes, demountables and tanks).

MEC S.p.a , based in Mondovì, in the province of Cuneo, has been operating since 1966. Taken over in 2005, it produces loaders, polyps, demountables, skip loaders and trailers, agricultural demountable with exhaust thrust system.

OMB Technology S.r.l. based in Brescia, has been operating since 1961. Taken over in 2014, it is specialized in the production of containers and vehicles for the side and back loading collection of waste.

The Busi Group's integrated system.

The strength of Busi Group is the result of a virtuous system, unique in its kind, which sees the perfect **integration and synergy between the companies** that make it up.

An integrated and dynamic system, constantly updated, in which each company complements the other and, through the **sharing of technology, knowledge, skills and analysis**, making it possible for Busi Group to enter the market **with a complete range of cutting edge products.**

THE GROUP'S COMPANIES

Three cutting edge companies in the collection, compaction and transport of waste.

CERTIFICATION

BTE S.p.A., MEC S.p.A. and OMB Technology S.r.l. they are ISO 9001 certified.

ECOLOGY

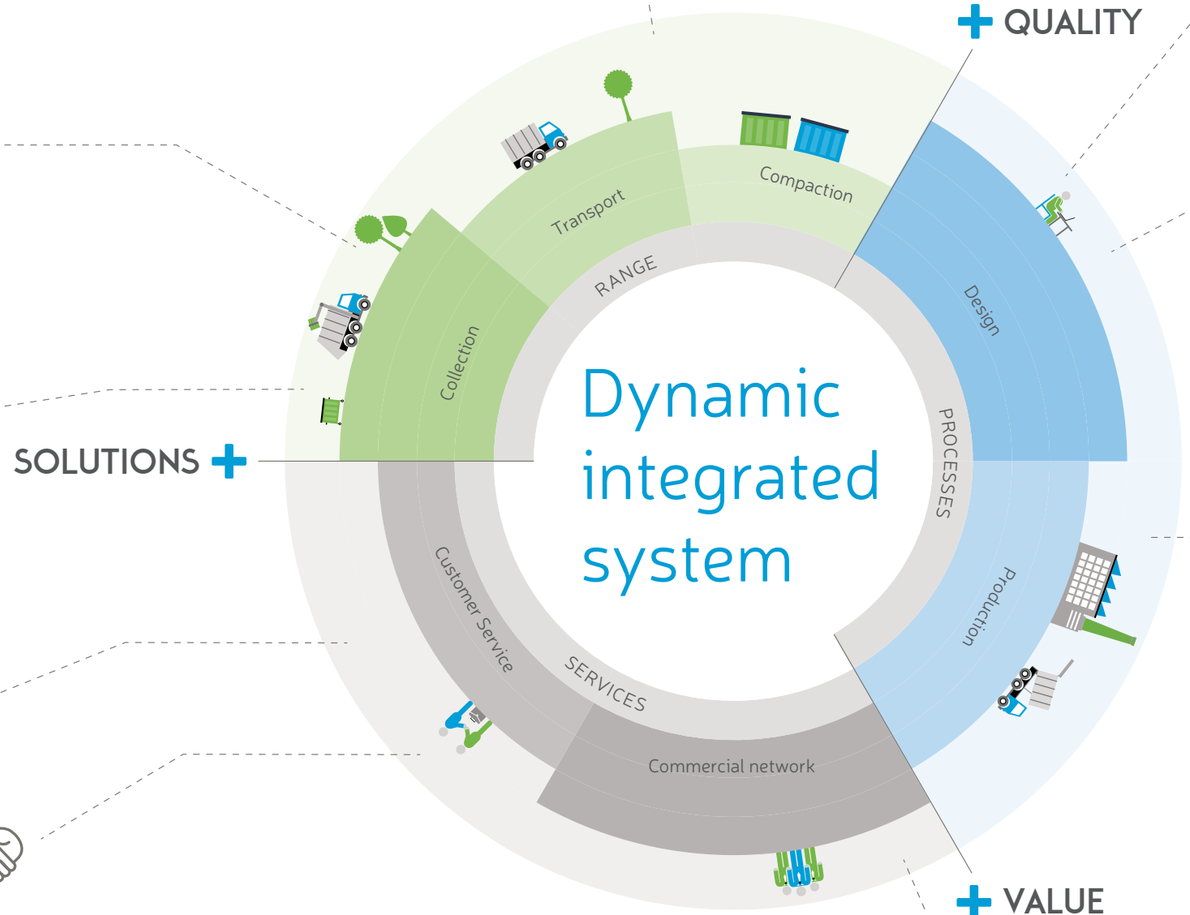

Busi Group offers products and technologies that help make the world cleaner.

CUSTOMER CARE

Busi Group offers a customer support service for prompt intervention in troubleshooting.

PEOPLE

Busi Group believes in the value of investing in people and resources of each of them, leaving room for creativity and personal initiative.

ADVANCED TECHNOLOGY

In the Busi Group a team of engineers and designers work on design solutions and innovative products to meet market demands.

OPTIMISATION OF WORKFLOWS

The finished product is optimised in all its phases: from the analysis of customer requirements to the definition of a competitive range.

QUICK DELIVERY

A single point of contact for all stages of production ensures efficiency in order processing and fast delivery times.

NETWORK IN THE WORLD

Busi Group operates via an extensive sales network not only in Italy but also worldwide.
